

NEoT Green Mobility and Rivage Investment agree senior debt financing to support ZEPLUG's EV charging solutions in condominiums and office buildings

NEoT Green Mobility, an investment platform specialized in providing turnkey financing solutions for low emission mobility assets, and Rivage Investment, an independent asset manager, have today announced agreement on a senior debt financing that will support a tailored "Charge-as-a-Service" ("**CaaS**") financing solution for ZEPLUG, the French leader in condominiums electric vehicles (EV and PHEV) charging solutions (B2C segment) and increasingly active in the office building sector (B2B segment).

The financing, which could reach more than 80 million euros, will enable Zeplug to achieve its goal of deploying 100 000 additional charging stations.

"Rivage is delighted to carry out its first transaction in the French EV charging sector, especially in the residential and office buildings sub-sector, which has robust tailwinds and with the French market leader in that space. The development of EV charging infrastructure is essential to support sustainable mobility and the transition to a low carbon society. This partnership with NEoT Green Mobility and ZEPLUG represents an attractive investment for our Article 9 Fund for Infrastructure Climate Solutions", says Hervé Besnard, CEO of Rivage Investment.

"We are proud to continue supporting ZEPLUG in its growth, hence upholding the relevance of its business model while positively contributing to the mobility energetical transition. The partnership with Rivage asserts our positioning aiming to design competitive tailor-made financing solutions to our partners" says Philippe Ringenbach, chairman of NEoT Green Mobility.

NEoT Green Mobility:

- NEEoT Green Mobility (NGM) is an investment platform funded by top tier investors. This platform is dedicated to financing the transition to Zero-Emission mobility and to supporting public authorities, transport operators, as well as logistics and industrial companies in their energy transition in Europe.
- NGM offers turnkey leasing and services solutions including provision of batteries, rolling-stock or charging infrastructures as-a-service to customers across a wide range of sectors: shipping, urban and inter-urban public transport, logistics, railway, and charging solutions. Backed by its investors, NGM has already deployed or committed to deploy c.€300m of assets

Rivage Investment:

- Rivage Investment is an independent asset management company created in 2010. It combines expertise in European infrastructure and French public sector debt financing. To achieve this, Rivage Investment brings together a multidisciplinary team of experienced professionals which structures and implements innovative financings to build high performing portfolios that have a positive impact.
- Rivage Investment serves many of Europe's leading institutional investors, particularly in the insurance, pension and retirement sectors. The organization's priority is to meet the expectations of investors and the challenges and opportunities of sustainability.
